University Teaching Enhancement in The Netherlands

Henk Dekker

Prezi for the European University Association
1st European Learning & Teaching Forum
Sorbonne Universités, Université Pierre et Marie Curie
Paris, 29 September 2017

Actors

- 1) Ministry of Education, Culture and Science;
- 2) Association of Universities in the Netherlands VSNU, and
- 3) Centre for Education and Learning (CEL) of the alliance of Leiden University, Delft University of Technology and Erasmus University Rotterdam.

Ministry of Education, Culture and Science

Policy document: *The Value of Knowledge, Strategic Agenda for Higher Education and Research 2015-2025*. 'Higher education in the Netherlands is good but it is not yet "ready for the 21st century". ... the current system is not adequately "future-proof"' (page 92). The Agenda sets out the action that needs to be taken in order to achieve the desired situation. Its three key themes are 'world-class education', 'accessibility, talent development and diversity', and 'social relevance'. Desired results include: more small-scale and intensive education; advanced programs for talented students, small-scale study facilities and digitalization, lifelong learning personal credit; research into higher education; experiments involving open online courses; and regional cooperation. Additional funding available over the period 2018-2025 will amount to almost 1 billion per year.

Association of Universities in the Netherlands VSNU

Priorities: intensifying education, more and better student guidance, appropriate study facilities, and professionalization of teachers.

Centre for Education and Learning

CEL is the result of two courageous and wise decisions of three university executive boards. First decision in 2012: Leiden University + Delft University of Technology + Erasmus University Rotterdam form an alliance. Second decision in 2014: Leiden University + Delft University of Technology + Erasmus University Rotterdam join forces in the Centre for Education and Learning (CEL) in order to provide the best learning experiences for a great study success of all their students. Activities are: 1. Research of Higher Education, 2. Development / Innovation, 3. Teaching Staff Development, 4. Community building.

Research: aim is more fundamental and applied research of higher education, and activities are chair professor Higher Education; research program Higher Education; post-docs; PhD's/PhD network; short research projects.

Development: aim is developing new and innovative online, blended, and on-campus teaching and learning strategies and materials, such as MOOCs, SPOCs, and apps for Augmented Reality.

Training: aim is professional development of teachers, teacher trainers and educational leaders both at the start of the career as well as for continuous professional development. Activities: website Student Success (= a repository of research reports), senior teaching qualification program, educational Leadership program, 'Innovation Rooms', and 'Teaching Labs'. Innovation Room characteristics are 1 part of the day - 09-12 + lunch; for teachers, researchers, and developers; activities include a combination of presentations, experiences, training; topics are for example, peer instruction; video in MOOCs; gamification; goal setting; learning analytics, intelligent tutoring systems, and augmented reality. Teaching Lab characteristics are: principle = you ask, CEL delivers; teachers are invited to apply; 12 applications are accepted (the ones with the best analysis and idea); the teachers gather in a nice place for 2 days; they work individually and in small groups; experts from the LDE universities support them; Carpe Diem methodology guides the participants in the design of their innovation projects; each participant develops his/her new idea in his/her own way and pace; at the end of the lab the participants present their innovation and after six months the results of their new teaching.

Community: aim is to build and support a community of all scholars who create and share knowledge of teaching and learning in higher education. Activities include the CEL Website, Newsletters, Annual Meetings. CEL is not only for Leiden-Delft-Erasmus. You are more than welcome to join!

Proposal

I would like to propose: 1) a CEL (Centre, forum, or institute for Education and Learning) for every university, for every alliance of universities, for every European country, and a CEL for Europe, 2) a CEL includes one or more general and/or disciplinary Chairs in Higher Education, research funding, development facilities, professional training opportunities, and a place to come together.
