Declaration on Sustainable Researcher Careers

- 24th February, 2019: MCAA symposium on career paths of researchers
- 400+ researchers discussed key issues and factors influencing sustainable research careers
- Internal consultations within MCAA, and Eurodoc
- Published on 27 May 2019

1. Provide sustainable career prospects for researchers

Problem:

- Short-term, doctoral and postdoctoral research funding
- Limited long-term career options in academia
- Decision to leave academia often postponed until the last minute

Recommendations:

- Long-term, predictable, and sustainable funding
- Early involvement of potential future, non academic employers
- Implementing career progress tracking systems

SCAN ME

2. Deploy career management services at organisations employing researchers

Problem:

- Little guidance on (alternative) career opportunities
- Institutions and research supervisors need to be transparent about potential employment opportunities
- Stress: available organizational support is still far from sufficient

Recommendations:

- Deploy services for career management to support individual career pathways
- Career guidance should be present early in the doctoral program
- Researchers need to be trained to reflect on their own skill set

SCAN ME

3. Put more emphasis on transferable skills training and recognition

Problem:

- Mismatch between academic and non-academic skill sets
- Transferable skills are critical to strengthen integrity and employability
- Researchers need to speak the non-academic language

Recommendations:

- Enrich researcher training with transferable skills training
- Excellence in transferable skills and community engagement should be part of researchers' regular performance evaluation
- Dedicated deliverables in research projects

SCAN ME

4. Provide wide variety of networking options and services in and outside of academia

Problem:

- High level of specialisation results in mental and physical isolation
- Building networks outside academia often depends on individual proactivity
- Non-EU researchers working in the EU are in a particularly difficult situation

Recommendations:

- Support researchers' inter- and intra-sectoral mobility
- Systematic organisational support
- Support in bridging cultural differences
