

SAFE online launch event and information on the call for applications and the matchmaking service

19 November 2024, 14.00-15.30 CEST

As part of the EU-funded [SAFE project](#) “Supporting At-risk researchers with Fellowships in Europe” that was launched in September 2024, this webinar aims at **informing potential host institutions** in the EU, as well as **researchers at risk** from any non-EU nationality about the [call for application](#) that will select up to 60 PhD/doctoral or post-doctoral fellows for a research stay in Europe.

After welcome addresses by EU representatives, issues such as the eligibility rules, the fellowship’s two tracks, selection will be detailed by the SAFE consortium during the presentation of the [call for applications](#) that will open on 18 November.

A specific timeslot will be dedicated to give more insights about the optional [matchmaking service](#) offered by the project until 13 December that aims at enabling researchers and host institutions to prepare a joint application in case they have no prior contacts before applying.

After both presentations, participants will have the opportunity to ask the questions they may have.

Registrations for the webinar are possible until 18 November through this [Zoom link](#).

The SAFE project is implemented by a consortium comprising the following partners: DAAD (coordinator), Campus France, PAUSE (hosted by Collège de France) and UNIMED.
